FLECK 5800 SERIES VALVES

CONTINUING THE LEGACY

MADE IN THE USA
OF FOREIGN & DOMESTIC PARTS

PRODUCT OVERVIEW

The 5800 Series of Pentair Fleck§ valves provide a common solution for a wide variety of filtration and softening applications. Developed on the same platform as the 5800, the 5810 and 5812 valves offer flexibility with a familiar appearance, while reducing carrying costs.

The 5800 Series provides:

- **HIGH-FLOW SOLUTIONS** for large residential and small commercial applications
- **FAMILIAR -** Uses the same Pentair powerhead and controller options
- **STANDARD VALVE BODY** for upflow, downflow and filter applications
- **EASILY SERVICED** with the same snap fit and seal and spacer principles

MAX FLOW RATES (GPM)	5800	5810	5812
SERVICE	21	36	43
PEAK	27	47	56
BACKWASH	17	28	33

Downflow valve only

FEATURES

5812

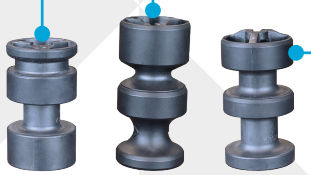
High Performance flexible 1-¼" Valve

2.5" & 4" threaded base

Filter Plastic Piston

Upflow Plastic Piston

Downflow Plastic Piston



Mechanical Stops

To prevent overtightening of plastic nuts

Seal & Spacer "snap-together" Cartridge with EPDM (black) Seals

For extended service life and simplified replacement

End Cap/Plug

Easily installed or removed using a screwdriver or hex wrench

5810

High Performance flexible 1" Valve

Side Mount Meter

With encapsulated magnets for reduced maintenance
